Opening and using Cisco AnyConnect VPN Client

1. Open the program from the Start Menu
   
   Start > Programs > Cisco > Cisco AnyConnect VPN Client > Cisco AnyConnect VPN Client

2. If the connect to box is empty please enter the following as shown:
   
   vpn.uow.edu.au

3. Click the Select button

4. In the next window, please enter your UOW Username and Password

5. Click the Connect button at the bottom of the screen
6. You will receive a message which states that you have joined a network as shown at right.

7. Click the Accept button

Your computer will now act as though it is on the UOW network.
